

feedback

must be given in a respectful way

Should be give in time to prevent further mistakes

It must be to correct a student, not to scary or to complain to the student

Techniques for giving feedback could be:

Compliment the student for what he has done well, then tell him what he needs to improve.

Stop what the student is doing to give feedback (give the feedback as soon as you see a mistake)

Improve their self awareness with questions on what he is doing wrong so he notices his mistakes

It is important to know...

That giving a proper feedback is a must whenever a student is learning, so he is more aware of what he is learning and will also pay more attention to what he is doing. Feedback is a teacher's responsibility, take it serious!
